ABOUT ME

Three years ago, I took a personality test. It helped me to understand that I had great abilities to be a programmer. From that day on, my interests in this profession increased day by day, until I decided to work professionally in this field.

It's really enjoyable for me to be in a part of a team and use my abilities. Also it is very delightful to encourage your teammates by your perseverance.

I'm a swimming coach and I spend my free time to exercise professionally, because I believe that "when our body is not in the healthy way, our brain wouldn't have it's best function"
